

COIN's Compare:Super streamlines the process of providing superannuation advice from research through to SoA generation, saving you time and effort.

Providing superannuation advice with ease

COIN's Compare:Super efficiently compares new and existing products side-by-side on screen, allowing you to make Reasonable Basis of Advice (RBA) comments that flow directly into your SoAs as RBA tables.

Key benefits include:

- efficiently compare new and existing products side-by-side
- provide advice that flows directly into advice documents
- be guided step-by-step through the advice process using the COIN web interface
- streamline insurance calculations with Rice Warner data
- access super product research from Mercer.

Find suitable products for your client

Select your client's objectives and let COIN's Compare:Super find their superannuation match.

Identify any potential loss of benefits

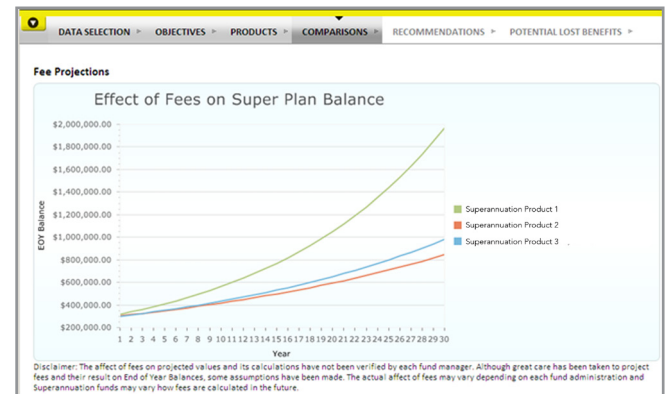

COIN's Compare:Super makes it easy for you to record your comments against each of the relevant features that result in potential lost benefits for your client.

Compare Fees

COIN's Compare:Super calculates fees based on existing and proposed positions, taking into account asset mix changes, rollovers or partial rollovers.
